Heather Sustersic  
Structural Thesis Advisor  
Had132@engr.psu.edu

Dear Prof. Sustersic,

The following report was written for Notebook Submission A for AE 841W. This document includes a thorough analysis and computations of typical dead, live and snow (including snow drift), wind and seismic loads. Thank you for critiquing my report and I look forward to discussing it and hearing feedback from you.

Sincerely,

Jesse Bordeau
